

THE HERITAGE

Good Looks & Traditional Features With a Contemporary Style

Using the Marley extensive range of top quality roof tiles means the Heritage is equally at home in both town and country. Its high specification traditional roof construction incorporates felt and timber battens for excellent weather and insulation performance.

Of course, with a 50 year roof tile guarantee and unique Dry Ridge and Dry Verge systems, you can be sure your Heritage will give years of low maintenance service.

Two garages, in two sizes, make the Heritage ideal for the larger home. You can specify any Heritage twin with a clear central area accessed by both doors, or an optional full height dividing wall. You can also choose brick-effect front posts to complement your brick-built home. And naturally there's the choice of four aggregate finishes plus our range of Red Cedarwood, steel and Regency steel up and over doors.
